Operating Precautions

- Keep the AC/DC Power Module plugged into the analyzer and a power outlet when not in use; and keep the analyzer on.
- **Do not** open the analyzer. There are no user-serviceable parts. Opening the analyzer violates the warranty and/or maintenance agreement.
- Do not use non-IDEXX Coag Dx Cartridges.
- Do not use cartridges that are past their marked expiration date or have been improperly stored.
- **Do not** force a cartridge into the analyzer.
- Do not use excessive force when pressing the analyzer's keys.
- Do not expose the analyzer to extreme temperatures (above 37°C/98°F or below 0°C/32°F).
- **Do not** drop the analyzer. **Do not** use the results if the analyzer is dropped during a test.

Connecting the Coag Dx[™] Analyzer to the IDEXX VetLab[®] Station (version 2.30 or later)

Connecting your IDEXX Coag Dx Analyzer to the IDEXX VetLab Station (Figure 1) lets you identify your client and patient, and automatically transfers the coagulation results to the patient's record.

Important: When the Coag Dx Analyzer is connected to the IDEXX VetLab Station, you cannot initiate a test run from the Coag Dx Analyzer. All test runs must be initiated from the IDEXX VetLab Station.

To connect the Coag Dx Analyzer to the IDEXX VetLab Station:

- 1. Be sure the Coag Dx Analyzer and the IDEXX VetLab Station are turned on.
- 2. Plug one end of the ethernet cable into the ethernet port on the side of the Coag Dx Analyzer.
- **3.** Plug the other end of the ethernet cable into the router that is connected to the IDEXX VetLab Station. Use the first available LAN port (labeled 1, 2, 3, etc.).

Important: Do not use the WAN port, which connects to the Internet.

4. When the Coag Dx icon appears on the Home screen on the IDEXX VetLab Station, your connections are complete.
